DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26 – 30 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent No. 5,763,932 to Pan et al.

3. Regarding claim 26, Pan et al. teaches a semiconductor structure (Figs. 9 – 14, for example) comprising:

a support (42);

a first material (44) on the support, the first material having a first etch rate;

a trench (54) formed through the first material and into the support; and

a trench filler material (72) deposited in the trench, the trench filler material

having an etch rate substantially similar to the first etch rate (Col. 4, lines 17 – 24; Col. 5, lines 46 – 48, both oxides are TEOS, so they would have the same etch rate), the semiconductor structure having an exposed upper surface formed of the first material and the trench filler material (See Fig. 14).

Regarding claim 27, Pan et al. teaches a semiconductor structure, wherein the first material includes silicon dioxide deposited from tetraethyorthosilicate.

Regarding claim 28, Pan et al. teaches a semiconductor structure, wherein the first material includes silicon dioxide deposited by chemical vapor deposition (Col. 4, lines 25 – 28).

Regarding claim 29, Pan et al. teaches a semiconductor structure, wherein the first material includes silicon dioxide deposited from tetraethyorthosilicate.

Regarding claim 30, Pan et al. teaches a semiconductor structure, wherein the first material includes silicon dioxide deposited by chemical vapor deposition (Col. 5, lines 45 – 48).

Response to Arguments

Applicant argues that Pan et al do not teach a structure, wherein both the trench filler and the first material are exposed. This feature can be seen in Fig. 14 of Pan et al., and further distinguished in lines 27 – 29 of Col. 6, where Pan et al. discloses that the silicon over the first material is removed by a wet etch process.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2811

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
